

POLICY ON WATER CONSERVATION

Context: The aim of the policy is to minimise water usage and conserve water. We strive to follow National Water Policy guidelines in the campus by adopting water conservation measures.

Principles and Strategies for Water Conservation

- In the campus water conservation is done by rainwater harvesting. During rainy season rainwater is collected and used for Botanical Garden,
- Sensitization on Water conservation is promoted by planting trees, by conducting green campus promotion activities and by organizing seminars and workshops.
- Restricted and optimal utilization of water is ensured by using overflow indicators in water tanks.
- Extension activities are organized to sensitize and educate the local community about the importance of water and the methods to conserve it.
- The department of Chemistry has set up water testing facility in its research laboratory for improving water quality by regular monitoring.
